

MOULDS FOR SPECIAL SHAPES.

Many Bottle users prefer shapes and designs of their own. For all such we are thoroughly equipped in our own extensive Machine Shop to make at short notice moulds for any practicable bottle, and at the lowest possible cost for first-class work. In ordering a special shape, an exact model of same should be furnished. In cases where this is impracticable, our own artist will produce a wooden model of the desired bottle if furnished with the idea by a drawing or otherwise. If we make the moulds no expense will attach for models; otherwise a charge for the actual cost of producing same will be necessary.

Special Moulds should always be in pairs for each size and shape, for **economy's** sake. Where large quantities of bottles are desired this is **indispensable**. Better and more uniform bottles are always secured when moulds are worked in pairs.

The cut herewith shows a mould for an oval prescription bottle. The mould is made of the best grade of gray cast iron, and weighs about 80 lbs
